What is Smart911?

Smart911 is a free service used by public safety agencies across the country to enhance communication and response for their community. It can be used by 9-1-1 agencies to quickly send first responders to the location of an emergency with more information, by emergency management to better plan for and respond to disasters, and by municipalities to send emergency notifications to their citizens.

By creating a Safety Profile for your family, you are providing potentially life-saving information to public safety officials at the time when they need it most.

Why Should I Sign Up for Smart911?

Today over 80% of calls made to 9-1-1 in the U.S. are made from mobile phones, and these mobile phones relay limited information about the caller. Unlike a landline, a mobile phone does not link directly to an address or include a caller's name. 911 call takers are trained to ask specific questions to determine the location of the emergency, who is in need of assistance and other specific details in order to send the correct response teams, to the correct location, quickly.

ALWAYS BE NOTIFIED

With Alerts powered by Smart911, you can sign up for notifications from your community to keep you informed of weather, traffic, and other emergencies. Hear immediately about life-saving actions you must take to keep yourself and your family safe.

Receive information about severe weather and how your community plans to prepare and act.

Avoid being late for that meeting again! Stay on top of traffic incidents and road closures.

Find out about emergencies in your area, such as gas leaks, missing persons, ongoing police pursuits, or other incidents that impact safety.

You can select the types of notifications and how you want to be notified.

Sign up for Alerts powered by Smart911 to take a large step toward improving your personal safety.

Is Smart911 secure

Information you provide is kept in our secure facilities and only made available to 9-1-1 call takers and responders in the event you call 9-1-1. We rely on industry-recognized security safeguards to keep all of your information private and protected. We utilize the same secure sockets layer (SSL) certificate authority and encryption technologies used by leading financial institutions. Our password-protection methodologies and processes are in accordance with leading public safety specifications. Your information is never sold, rented or shared with third parties for their promotional use. The only people that see your information are the public safety officials responding to your emergency. Additionally, we work with leading wireless service providers to ensure industry standard security policies are adhered to throughout our infrastructure.
